Emerging Energy Learning Community

Learning
Communities
Learn together with US

In a learning community, you'll learn with friends and thrive at **UNCG!**

Learning Communities at UNCG feature integrated learning.

All communities include two to three courses that are integrated for deeper learning. This means that learning community students will be enrolled in shared courses that integrate assignments across multiple courses. For the student, you begin to see how courses and disciplines are interwoven across programs and majors.

Emerging Energy Learning Community

The Emerging Energy Learning Community brings together students and faculty from all walks of life to examine the potentials to transform how we think about sustainable practices in everyday life. Connecting 21st century students concerned about the environment with interdisciplinary faculty and courses, the Emerging Energy LC answers the call to transform greater Greensboro.

The community is intended for students across all four years, culminating with UNCG's participation in the U.S Department of Energy's Solar Decathlon (a biannual competition which challenges collegiate teams to design, build, and operate solar-powered houses).

**Open to all majors including
iARC LC students**

Required Courses:

Fall **STH 101: Introduction to Sustainable Development**
ISL 101: Connections, Collaborations & Inquiry
Spring **ENV 100: Introduction to Environmental Studies**
IAR 124: Sustainable Design 101
